**Abstract**

PURPOSE: To obtain release paper that is superior in heat resistance and wettability and is suitably used in a process of producing a synthetic leather using a water-soluble or water-dispersible resin.
CONSTITUTION: Release paper comprises a paper substrate and a release layer laminated on the paper substrate. In the release paper for producing a synthetic leather, the release layer is made of a 4-methyl-1-pentene polymer composition containing 80-97 pts.wt. (A) 4-methyl-1-pentene polymer and 3-20 pts.wt. (B) ethylene-ethyl acrylate copolymer.
